

FORSTHOFF-F automatic hot-air welding machine

The optimum automatic welding machine for floor layers.

Product description

The automatic welding machine FORSTHOFF-F can be used to weld PVC floor coverings and to fusion-weld and seal linoleum coverings. The heat output of 4000 W 230 V AC is electronically adjustable from 20 to 700°C. In addition, the device is equipped with an infinitely variable speed adjustment from 0 to 19 m/minute and can thus be adapted to the individual types of materials. A high-temperature resistant coating of the pressure roller and wire guide guarantees a neat

unwinding of the welding wire. The universal unwinding device matches all commonly used wire coils. The device is completely equipped ready for welding and furthermore offers an automatic wall switch-off. The machine starts automatically after the weld head has been swivelled in. The machine casing's three-point support ensures that the machine runs steadily.

Technical specifications

Model	FORSTHOFF-F
Voltage	230 V 50/60 Hz
Heat output	4000 W 230 V
Temperature	20 – 700 °C, infinitely variable
Weight	21,0 kg
Dimensions	Length 520 mm, width 310 mm, height 330 mm (without guide handle) Length 600 mm, width 310 mm, height 870 mm (with guide handle)

Areas of applications

- Flooring construction and flooring materials
