

## Hand-held welding torches Quick-S-Electronic

The new manual welding equipment from the S-Line product range. An ergonomic and innovative design combined with state-of-the-art technology for welding and for the processing of thermoplastics.

### Product description

The hot-air welding equipment Quick-S-Electronic stands out for its unique ergonomic handle. Thanks to its ergonomics and light weight the user can handle the equipment professionally and effortlessly.

The equipment has a heat output of 1500 Watts 230 V and a constant and completely reliable electronic control for temperatures up to 700 °C.

Moreover, the equipment is easy to service thanks to a new motor generation with considerably increased carbon service lives of more than 1,500 hours. The collector carbons are also equipped with a disconnection organ, which prevents damage to the motor after the carbon brushes have been worn down. The collector carbons can be changed several times. Carbons can be easily changed from the outside without the need to open up the equipment.

The air-cooled heating element pipe is suitable for various different shapes of nozzle.

The all-round equipment for the welding all thermoplastics, technical textiles, tarpaulin sheets, pond sheeting, roof sheeting and swimming pool construction sheeting.
